# Watco Flex: The perfect solution for offset drains.

**NO!**

**YES!**

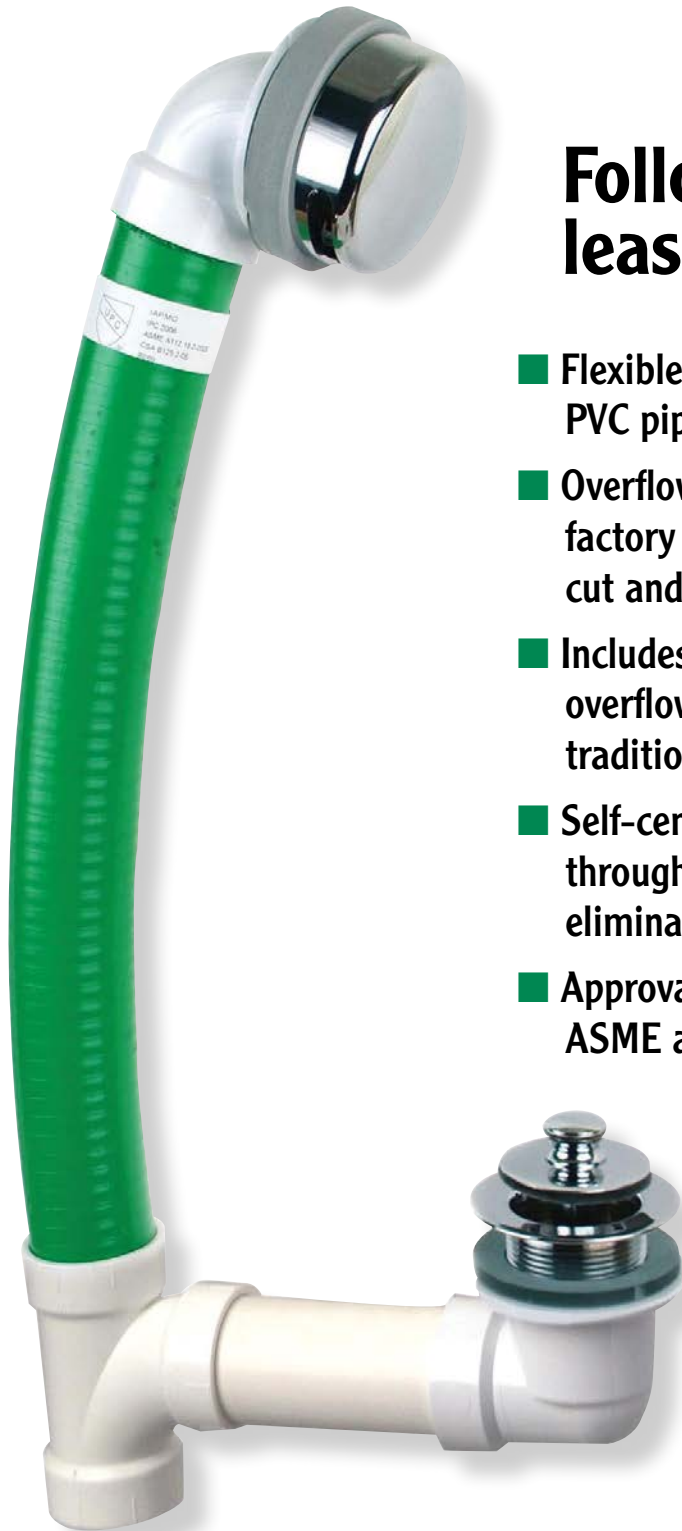

**Say goodbye to difficult, time-consuming drain alignment problems once and for all.**

In new construction, you often find that the tub overflow is not aligned with the roughed-in drain, especially in multifamily buildings with concrete floors. Watco Flex is the solution.

- Watco Flex eliminates the need for multiple fittings and glue joints.
- Watco Flex easily bends to adjust for drain misalignments.
- Watco Flex reduces installation time and labor costs.

# Watco Flex

## Follow the path of least resistance.

- Flexible PVC tubing bends, unlike rigid PVC pipe.
- Overflow end of the Flex tubing is factory welded. Tee end of Flex can be cut and fit to length.
- Includes high-flow, snap-on Innovator® overflow, having twice the capacity of traditional overflows.
- Self-centering overflow ell extends through tub's overflow hole, eliminating leaks.
- Approvals include UPC, IAPMO, IPC, ASME and CSA.
